

## symposium hall edinburgh

**CLIENT:** The Royal College of Surgeons of Edinburgh

**ARCHITECT:** Benjamin Tindall Architects

**M&E Value:** £0.4m

**SECTORS:**

Historical > Refurbishments

Public Buildings > Historical

This project involved major alteration and upgrading works to the College's main auditorium building which is constructed within a former church.

Completely new mechanical and electrical services were installed to provide a state of the art auditorium facility of international standard with environmental systems capable of maintaining good conditions even with dense occupation.

All of the mechanical and electrical services are being replaced with new installations.
